

SiteTalk Expands into Digital Entertainment Streaming and Downloading with SiteTalk Music

London, UK November 19, 2013 – *Global Digital Systems PLC (GDS PLC), owner of SiteTalk.com, one of the world's fastest growing Social Networking Platforms with more than 15,000,000 Members, is pleased to announce that it is finalizing an agreement with a major digital entertainment provider that will allow Members to download and stream digital entertainment content and make money by reselling content.*

Agreements are being finalized that will allow SiteTalk and its Members to benefit from one of the fastest growing trends in digital media: online music streaming. "SiteTalk Music" will bring SiteTalk Members a new streaming music and entertainment service with access to more than 18 million song titles, plus DVDs, ebooks and audio books. This unique new service will be available to all SiteTalk Members on a monthly subscription basis.

We are particularly excited about this relationship because it further enhances SiteTalk's primary function as a Social Media Platform that allows Members to connect, communicate and create business opportunities.

With this new service, listening to music will be just one aspect of the experience. Once the agreement is finalized and implemented at SiteTalk.com, SiteTalk's Members will be able to create playlists and actually be paid for distributing music and other digital content to the masses both at SiteTalk.com and on other websites, by using simple embed codes.

Additionally, bands and artists will be able to use SiteTalk Music to promote, sell and profit from their own music and other digital content.

According to new research from Parks Associates, the number of users of major music streaming services, such as iTunes and the soon-to-be-launched SiteTalk Music, has increased by more than 200% since 2011. What's more, the growth in users willing to pay for those services has increased more than 80%.

"This is a very important moment in the evolution of SiteTalk as a Social Networking Platform," said Frank Ricketts, General Manager of SiteTalk. "The online streaming and downloading experience is the number one trend in the delivery of digital entertainment today. By allowing our Members to experience this not just as entertainment, but also as a business opportunity, we have once again tied together the social networking experience with the business experience, and we believe this is the future of the Social Networking Platform."

SiteTalk and its content partner are finalizing a mutually beneficial agreement and expect

to launch SiteTalk Music formally before the end of 2013.

SiteTalk Music will initially host approximately 18 million titles followed shortly after with the launch of DVDs, audiobooks and ebooks.

About Global Digital Systems PLC

Global Digital Services has been created to acquire other companies that are in the online social networking space. Our focus is “Rough Gems” – enterprises that have outstanding potential but need a little help. Presently, Global Digital Systems PLC’s sole asset is SiteTalk Community Inc.

About SiteTalk.com

SiteTalk.com is a multi-functional and multi-lingual social networking platform that enables members to connect, communicate and create business opportunities. SiteTalk allows people to meet or recommend products or services for the benefit of other members. SiteTalk’s goal is to ensure that everything that can be shared, bought, used, consumed, distributed or sold on the internet is made available on the SiteTalk platform, which in turn increases the scope of business opportunities for its members.
